JULY - 22, 2025

Dear Mr. Halim,

I am writing to express my enthusiasm for the Junior Machine Learning Engineer position at IBIZN, as advertised. As a recent graduate with a Bachelor of Science in Computer Science, I am eager to leverage my academic background and passion for artificial intelligence within your innovative team.

Throughout my studies, I have developed a strong foundation in machine learning principles and programming skills, particularly in Python. My coursework involved hands-on experience with libraries such as NumPy and Pandas, allowing me to engage deeply with data manipulation and analysis. Additionally, I have explored core algorithms like decision trees and neural networks through various projects that sparked my creativity while honing my problem-solving abilities.

I am particularly drawn to IBIZN's commitment to employing cutting-edge technology to address complex business challenges. The opportunity to contribute creatively while collaborating with experienced engineers excites me immensely. I thrive in dynamic environments where critical thinking is essential, and I am eager to support the design and deployment of intelligent systems that drive growth for your clients.

Moreover, I continuously seek knowledge about advancements in machine learning technologies. This curiosity fuels my desire not only to learn but also actively contribute fresh ideas within collaborative settings.

Sincerely,

Arif Shekh
